Alot of issues with role managment from start to finish

```ruby
class CreateMenuItems < ActiveRecord::Migration[6.0]
  def change
    create_table :menu_items do |t|
      t.string :name, limit: 24
      t.decimal :price, precision: 4, scale: 2

      t.timestamps
    end
  end
end
```

db > migrate > 🦞 20200520035546_change_data_for_menuitem.rb

```ruby
1  class ChangeDataForMenuitem < ActiveRecord::Migration[6.0]
2    def change
3      change_column :menu_items, :price, :decimal
4    end
5  end
6
```

Dwayne has_many problems, this one was truly frustrating because of how easy it could have been avoided, although fixing it i know about change_columns,lesson learned will never forget 8/10 annoying bug
